

KV First Aid

Website Quote and Proposal

First aid training · Kloof, KwaZulu-Natal

VERSION 1

Prepared by Zander Harmse	Developer Jaime Futter	Issue date 3 September 2026	Valid until 3 October 2026
-------------------------------------	----------------------------------	---------------------------------------	--------------------------------------

0 1

The Short Version

What this is, in one paragraph.

You asked what a basic website would cost. Rather than send a proposal describing one, we built you a working concept first, using your own branding, your own words and photographs from your own Facebook page. What follows is a quote for something you have already seen and clicked through, not a description of something that might one day exist.

The concept is a single, well-made page with a six-article first aid journal behind it, built to do one job: turn somebody searching for first aid training in Kloof, Durban or Pietermaritzburg into a WhatsApp message on your phone.

Status	Concept built and complete. Awaiting your sign-off before it goes live.
Built for	KV First Aid · Katie Carter
Service area	Based in Kloof, with a training room on the premises. Onsite training from Pietermaritzburg through to Durban.
What it runs on	Hand-built HTML, CSS and JavaScript. No page builder, no template, no monthly software licence.

What Has Already Been Built

Every item below exists and works today. Nothing here is a promise.

SECTION	WHAT IT DOES
Hero	Your headline, your KV navy and circular logo, and a live heartbeat trace across the foot of the screen that picks up the pulse line already in your branding.
About	Your own words: fifteen years of teaching, the travelling first aider, and the training room in Kloof.
Our Work	A real photograph from a real course. There is no stock photography anywhere on this site.
Courses	First Aid Level 1 and Level 2, Childcare First Aid, Teenage First Aid, Fire Training, and first aid kits and refills.
Compliance	A section written for the companies who book you: what the Occupational Health and Safety Act asks of an employer, and the certificates their risk assessment file needs.
Journal	Six articles: CPR, choking, first aid boxes, serious bleeding, burns and refresher training. Written with FAQ markup in the code so search engines can read it properly.
Book	Google Map of Kloof and your service area, directions link, and your phone, email and Instagram in one place.
Always on screen	A WhatsApp button going straight to 083 444 9573, and a quick-questions widget answering where you train, what you offer and how to book.

Built mobile-first, because that is where nearly every enquiry will come from, and lightweight enough to load quickly on a phone with one bar of signal.

Investment

Priced from the Arkatype 2026 rate card. A set package price, with add-ons only where the build genuinely needs them.

The Signpost

One premium page, built and ready. This is the concept you have seen.

- Custom designed and hand built to the KV First Aid brand, never a bought template
- One long-form page: hero, About, Our Work, courses, compliance, journal and booking
- The six-article First Aid Journal, with FAQ schema markup in the code
- Signature Arkatype motion: the live heartbeat trace across the hero
- WhatsApp button, click-to-call, Google Maps and directions
- Quick-questions widget answering the things people actually ask
- Basic on-page SEO, business schema and Google indexing
- Hosting, domain setup and deployment handled
- One round of revisions

R4 500

once off

Add-ons

Only the items this particular build actually needs. Nothing is bundled in to pad the number.

ADD-ON	WHY YOU MIGHT WANT IT	PRICE
Online booking	Course bookings taken on the site and synced to your Google Calendar, so a company can book a date without a single back-and-forth message. Optional.	Quoted on scope
SEO Launch setup	Technical SEO, Google Business Profile and indexing, so you appear for searches like "first aid training Kloof". Worth doing once the site is live and settled, not on day one.	R4 500
Extra pages	A separate page per course, if you later want each one to rank and sell on its own.	R1 400 each

Payable now

The Signpost, complete and live. Add-ons are commissioned separately, only when you want them.

R4 500

total

What sits outside this price

- The monthly care plan, covered in section 05

- The DialCover voice agent, covered in section 06. It is a standalone service and is not included in the build price or in any care plan
- Online booking and SEO Launch, listed above and commissioned only when you are ready
- Domain renewal, billed at cost, typically R150 to R400 a year

0 4

Payment Structure

Two ways to settle the R4 500. Pick whichever suits the cash flow.

Option A · Standard terms

Our usual split, straight off the rate card.

- R2 250 deposit, being 50 percent, to secure the build slot and begin work
- R2 250 on final approval, before we hand over the keys
- Simplest option, and the site goes live fastest

R4 500
total

Option B · Six month payment plan

Spread across six months. No interest, no admin fee, same total.

- R900 down payment on signature, which secures the build slot and begins work
- Six equal monthly instalments of R600, billed on the first of each month
- Delivery does not wait for the final instalment. The site goes live on schedule
- Should an instalment be missed, the remaining balance becomes due and work pauses until it is settled

R4 500
total
RECOMMENDED

R900 down payment plus 6 × R600 equals R4 500 in total, the same as option A.

A twelve month plan is also available

When we first spoke we offered to spread the build over twelve months, and that offer stands. Twelve monthly instalments of R375, same total, same terms. Say the word and we will write it up that way instead.

Ownership

Once the final payment is settled, the site is yours. Full stop. That includes the code, the content and every credential attached to it. There is no lock-in, no commission on your bookings, and no obligation to keep us on afterwards.

Ongoing Care

A website is a bit like a car. It needs the occasional service. Cancel any time with 30 days notice.

PLAN	WHAT IS INCLUDED	MONTHLY
Essential	Hosting, SSL, daily backups, uptime monitoring, security patching and 30 minutes of changes	R450
Professional	Everything in Essential, plus 2 hours of content or design changes and a monthly performance report	R1 200
Priority	Everything in Professional, plus 4 hours of changes, speed optimisation, same day response and a quarterly strategy call	R2 400

Our recommendation: Essential at R450 a month

You are one trainer running your own courses, not a shop with a changing catalogue. The site will not need much moving around month to month, mostly course dates and the odd photograph, which the 30 minutes in Essential covers comfortably. Professional exists for businesses updating a menu every week, and you are not that. If that changes, you can move up at any time.

Your first month of care is on us.

Hosting and deployment are included in every care plan. Your domain renewal is billed at cost. Anything beyond the hours in your plan is billed at R750 per hour, quoted and approved by you before we build it.

DialCover · AI Voice Agent

An optional AI call answering agent. Priced separately, not covered by the build price or any care plan.

You teach for most of the day. The phone rings while you are mid-CPR demonstration with eight people watching, and you cannot take it, so a company looking to book a course for their staff leaves a voicemail, or more likely does not. DialCover is an AI voice agent that answers in a natural voice when you cannot, and makes sure the enquiry still reaches you.

What the voice agent would handle for you

- Answers missed and after hours calls in a warm, natural voice trained on KV First Aid
- Which courses you run, what each one covers and roughly how long it takes
- Whether you travel to them, and that you have a training room in Kloof
- Group bookings, capturing the company name, how many staff, and the dates that suit them
- Takes the caller name, number and reason for calling, every single time
- Sends you a written summary of each call by WhatsApp within seconds

DialCover voice agent

AI call answering, set up and trained on KV First Aid.

- Voice and personality tuned to your brand
- Trained on your courses, service area and how you work
- Call routing rules set to you
- Integrated with the website enquiry flow so nothing sits in two places

R3 500

setup, once off
OPTIONAL

DialCover monthly

Per number. Keeps the agent answering.

- Includes a bundled allocation of call minutes
- Monthly reporting and ongoing refinement
- Script and knowledge updates as your courses change
- Cancel any time with 30 days notice

R1 650

per month

A quick honesty note

Automation only pays for itself if the thing it replaces is genuinely costing you. R1 650 a month is real money for a one-person training business, and we are not going to pretend otherwise. If you are not missing enough enquiries to justify it, we will say so. Get the site live first, see how many enquiries actually come through, and revisit this in a few months with real numbers rather than a guess.
